INTERNET PROTOCOL (IP) CAMERAS

IP cameras offer cutting-edge digital surveillance with superior image quality, easy network access, and high security. These cameras feature resolutions up to 12 MP, H.265 compression for reduced bandwidth, and an intuitive CMS software for advanced access control and surveillance.

KEY ADVANTAGES OF IP-BASED CCTV SURVEILLANCE

- **High Resolution:** Up to 10MP, providing clearer images than analog.
- **Cost Efficiency:** Reduces installation costs via wireless data transmission.
- **Scalability & Flexibility:** Expands easily with business needs.

- **Remote Access:** Secure, real-time monitoring from any device.
- **Simplified Installation:** User-friendly setup for reliable security.
- **Unified Network:** Shares data, voice, and wireless channels, lowering operational costs.

ANALOG HD SERIES

As a distributor of Glofine Group, we offer robust analog cameras with high-definition capabilities, designed to meet rigorous security standards with options such as Dome, IR Bullet, and PTZ cameras for flexible, reliable surveillance.

ORINSONG FIRE SAFETY SOLUTIONS

Combine Networks proudly distributes Orinsong's top-grade fire safety products in Pakistan. From fire alarm control panels to smoke detectors, we ensure comprehensive, customizable fire safety solutions that meet clients' diverse needs.

E-BIO PRODUCT RANGE

As a distributor for EBIO, we offer biometric systems that feature cutting-edge technology in facial, fingerprint, and iris recognition, providing businesses with secure, reliable access control and attendance solutions.

BIOMETRIC TIME ATTENDANCE SYSTEM

Our biometric solutions leverage unique physiological traits for accurate employee time tracking, preventing "buddy punching" and ensuring efficient, reliable attendance management.

BANK ALFALAH COMMAND AND CONTROL ROOM

Combine Networks supported Bank Alfalah in establishing a centralized command center, enabling real-time monitoring of over 600 nationwide locations. Our team managed equipment supply, installation, and nationwide service to ensure seamless, comprehensive surveillance.

HOSPITAL SOLUTIONS

Enhancing Patient Safety with Fall Detection Systems

Hospital Staff

The staff's information are imported to the DSS Pro to receive access authorization.

Patients or Family Members

Patients or family members need to register at the reception station to get access permission.

Temporary Visitor

A temporary visitor calls the nurse through the VTO. The nurse opens the door remotely after video confirmation.

Access Control

HOSPITAL SOLUTIONS

Rapid Emergency Response:

Instantly alerts medical staff to falls, ensuring timely assistance.

Enhanced Patient Monitoring:

Provides continuous safety oversight, reducing the risk of unnoticed incidents.

Peace of Mind for Families:
